### Colostomy surgery for baby Emmanuella

Emmanuella Luntadila, an 8 year old fatherless girl, from a poor family was received at HJ Foundation. She had a digestive disorder and had an operation for appendicitis in a local hospital. Unfortunately the operation was not successful and her health condition deteriorated severely. The family however, was quick to contact HJ Foundation with a request for medical care. Their request was approved by our founder Mr. Harish Jagtani. The surgery was conducted successfully at HJ Hospitals. Today Emmanuella Luntadila is doing very well.

## Gynecology camp in Lufungula

HJ Foundation in close collaboration with HJ Hospitals accompanied PBM Health in a campaign called "My Health, My Right". This campaign included: prenatal consultation, gynecological screening, malaria screening, and distribution of medication, information and sexual education.

During the consultation

## Malaria screening camp at the orphanage SECAM at UPN

Malaria is responsible for the largest number of deaths worldwide.

HJ Foundation has always advocated for the fight against malaria by organizing numerous free screening campaigns in several parts of Kinshasa including the distribution of anti-malarial drugs for positive cases detected during the campaign support by our partners SANRU, ACTM & Shalina Pharma.

This campaign was held at the SECAM orphanage at UPN/Ngaliema where we screened about fifty children. The children also benefitted from a free eye checkup.

## Ophthalmologic consultation

## Distribution of toys
